- Seamless or 2 mm screens
- 160° horizontal and vertical angle
- Display Ratio 4:3

Launched in May 1997, the **LiteMaster 800** was the first DLP™ cube introduced in the display wall market. With more than **7,000 cubes** installed in the world, it has been SYNELEC “**best-seller**” until year 2000.

LiteMaster 800 offers a very good combination of resolution and brightness that matches the most common control room requirements. Optimized with the new SIP features, it is the right choice for entry level display wall solutions.

Ideally, the LiteMaster 800 will be used with **50" diagonal screens**. ■
