- 1 Autoscan input
- High Gain & High Contrast screen
- Mullion: 2 mm
- 120° horizontal and 70° vertical viewing angles
- 500:1 contrast ratio
- Brightness: from 380 to 700 cd/m²
- Screen size: 50" and 67"

The **LiteVision-A (Autoscan)** self-contained "smart cube" that doesn't need an external processor to display pictures, applications or videos on a single or multiple cube wall. A simple switcher matrix, combined with the embedded controller (inside the cube), offers plug & play capabilities on the entire wall.

You have the capability to zoom in/out the image, work on part of an application (Data Extract) or even to display a 16:9 ratio picture on the display. The **LiteVision-A** is a perfect cube for applications such as Presentation Rooms, Entrance Halls, Exhibitions, Small or Medium Boardrooms...

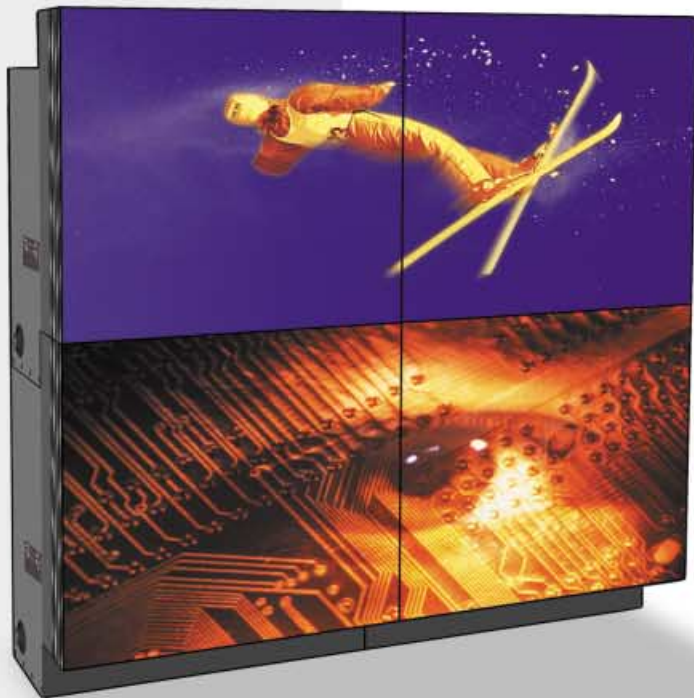

The **LiteVision-A** is ideally used with **50" screens for SVGA display**, and **67" screens for XGA display**. ■

LITEVISION-A SERIES: SELF-SUFFICIENT SMART CUBES

▲ Full screen display ▲ 16:9 display on 4 cubes

▲ 2 images on 4 cubes ▲ 4 images on 4 cubes
