Fifteen years of experience in the display technology industry gives Synelec the expertise to dedicate a product specifically for the Corporate Market. The **LiteVision** was developed specifically as a Corporate display solution for Boardrooms, Lobbies, Presentation areas and Exhibitions.

The **LiteVision-S (SVGA)** is the entry level display solution offering an excellent combination of resolution, price and brightness. The high gain screen delivers an image quality, a brightness level and a contrast ratio that responds to all Corporate market needs.

The **LiteVision-S** is ideally integrated with Synelec Wallstation image processor. ■
